

Bobcat

One Tough Animal

COMPACT EXCAVATORS

E16, E17z, E19, E20z

1–2t, R2-Series

🌐 EMEA

TOUGH CONDITIONS. TOUGHER PEOPLE.

At Bobcat, we're not just building machines—we're also celebrating the people who push them to the limit. Because real strength isn't just built into machines—it comes from the people who operate them.

[LEARN MORE](#)

INTRODUCTION

ONE TOUGH ANIMAL

► OUR MISSION

We empower operators to accomplish more, while working in the toughest conditions and tightest situations. When our customers have the will, we provide the way.

► BOBCAT'S HISTORY

In 1958, the Melroe Manufacturing Company introduced a compact front-end loader that quickly evolved into the M400, the world's first true skid-steer loader. The company soon adopted what became the world famous "Bobcat" brand — and its success paved the way for the global compact equipment industry we see today.

► INNOVATION CENTRE IN DOBŘÍŠ

Today, Bobcat's EMEA headquarters in Dobříš, Czech Republic, serves as a hub for innovation. Here, a manufacturing plant produces around 25 000 machines annually for EMEA customers and global export. The site is also home to the Bobcat Innovation Centre, where rigorous testing and product development take place using advanced facilities like climate and anechoic chambers.

► BOBCAT TODAY

With over 60 years of manufacturing experience and a commitment to ongoing innovation, Bobcat has delivered millions of machines to the market. Known for their high performance, reliability, and unparalleled comfort, the diverse lineup caters to various applications. Whether it's landscaping, snow removal, construction, demolition, or roadwork, Bobcat machines empower users to accomplish more.

Compact Excavator E16, E17z, E19, E20z **3**

SMOOTH POWER & PREMIUM COMFORT

► BIG PERFORMANCE, COMPACT DESIGN

Enjoy big performance, all-day comfort, and easy transport with our compact yet powerful excavators. Our machines offer versatility, precise positioning, and convenience for a more productive workday. Plus, with enhanced durability, you can optimize performance while minimizing maintenance needs.

► EASY AND PRECISE

Get top performance with our upgraded hydraulic system, featuring a load-sense pump, closed-center hydraulics, and premium joysticks for smooth, easy operation.

► ALL-DAY COMFORT

Enjoy all-day comfort and efficiency with our auto-idle engine, boosting fuel economy while reducing noise and vibration. Plus, stream your favorite tunes with the convenient BT DAB Radio.

► HASSLE-FREE TRANSPORT

Our machines are built for easy transport, featuring optimized lift points, integrated tie-down points, and an automatic slew brake for hassle-free relocation to your next job.

► NEXT LEVEL DURABILITY

We've added reinforced easy-opening covers, under-boom lighting, wider track clearance, improved bucket link mechanisms, better cylinder fittings, and long-lasting tracks—everything to help you perform at your best.

PERFORMANCE

EFFICIENT POWER

Improved Bobcat hydraulic architecture for all new models paired with a new engine delivers an unbeatable performance. Fast cycle times, combined with smooth control of class-leading breakout forces, provide maximum productivity. Boom and dipper stick cylinder cushioning – unique in their class – enhance overall smoothness.

LIFT MORE, LIFT HIGHER

The superior dumping height makes loading trucks easy, while the reach at ground level means you don't need to reposition as often when digging. With enhanced stability and lifting capacity, combined with low-effort joysticks make the operation very smooth and powerfull at the same time.

POWER WHERE YOU NEED IT

RIGHT TOOL FOR THE JOB

In backyards, urban areas and other tight-fitting jobsites, a big machine means big challenges. Bobcat machines allow operators to work in constrained environments, in extreme proximity to walls and other challenging situations.

ZERO HOUSE SWING

The Bobcat Zero House Swing (ZHS) concept enhances Zero Tail Swing (ZTS) functionality by further protecting the front upper-structure corners turning within the swing circle. The design also eliminates the protrusion of the boom swing cylinder during parallel digging.

Conventional tail swing

Zero House Swing (ZHS)

STEP INSIDE

► **PRECISION MEETS PRACTICALITY**

Take a seat and immediately get to grips with the intuitive controls – ideal for both experienced and novice operators. Joysticks with all key functions in the right place, smooth travel pedals, and personalized controls for pinpoint accuracy.

► **DELUXE DASHBOARD**

Bobcat 1–2t excavators feature an intuitive control panel and keyless ignition for increased convenience and security.

► **SEE MORE, WORK BETTER**

The tall, wide windows inside Bobcat compact excavators provide as much glass surface area as possible. Add narrower side pillars, and you have visibility that's never been better.

► **EASY ENTRY**

Our excavators prioritize operator comfort, making it easy to enter and exit the cab with thoughtfully designed handles and step height.

► **PERFECT SEAT**

Stay comfortable all day with ergonomic, easily adjustable seats with suspension options.

► **IN ALL WEATHER CONDITIONS**

Stay comfortable and focused on the job all year round with direct cab temperature control.

BUILT TOUGH

► TOUGH MATERIALS

The use of highly durable materials makes Bobcat excavators hard-wearing and robust.

- Rear tailgates protected by cast counterweights
- Oversized cylinders for long life
- New paint and surface treatment process
- Reinforced expandable undercarriage enhances rigidity
- Cylinder covers for heavy applications

► TESTED DESIGN

The design features are tested under extreme conditions and ensure extra durability and peace of mind while working.

- Metal covers can be opened or bolted on
- 2-piece blade cylinder hoses
- Wrenchless hydraulic hose technology helps prevent leakage
- Proven boom and dipper stick design
- Top-mounted boom cylinder

► MACHINE IQ

Bobcat Machine IQ Wireless Communications enhances the support for your Bobcat machine.

- Durable built-in monitoring electronics
- Data is available to our machine monitoring specialist
- Maintenance is optimized for your business
- Data-driven services maximize uptime

► STANDARD WARRANTY

Bobcat Company develops every machine to the highest standards of quality and durability. That's why our standard warranty provides 24 months or 2 000 operating hours (whichever occurs first) of coverage.

**THERE'S NO TIME
FOR DOWNTIME.
STAND UP TO THE
HARSHEST CONDITIONS,
DAY AFTER DAY.**

► PROTECTION PLUS EXTENDED WARRANTY

Enjoy total peace of mind with a Protection Plus extended warranty. Providing the same level of protection as the standard warranty, Protection Plus also reflects different customer needs and expectations by offering a choice of durations and annual operating hours. According to your needs, you can benefit from the coverage for up to 5 years or 6 000 engine hours. And Protection Plus is transferrable — so it will likely increase your machine's resale value.

► BOBCARE PLANNED MAINTENANCESM

A long-running machine starts with proper planned maintenance. And it helps protect against repair costs and unplanned failures when you're counting on your machine to work.

- Avoid risk by preventing major repairs and complete failures.
- Accomplish more by reducing downtime and increasing your productivity and profitability.

E16

► LIGHTER AND SMOOTHER

This entry level 1.5 ton excavator — designed for easy transportability.

- Transport mass
< 1.5 t (canopy)
< 1.6 t (cab)

E17z

► WORK ANYWHERE

For operators looking for compactness and easy transportability.

- Transport mass just under 1.6 tons

E19

► PERFORMANCE MEETS COMFORT

For experienced operators focusing on performance and operator comfort.

- Class leading lift capacity and stability
- Low effort joysticks for precise movement control
- Autoshift travel motors guarantee better traction and manoeuvrability

E20z

► ULTIMATE PERFORMANCE IN A COMPACT PACKAGE

For operators looking for compactness without sacrificing operator comfort and performance.

- Zero House Swing functionality (even with a cab)
- Best-in-class stability for a conventional machine
- Low effort joysticks for very precise control of movements
- Autoshift travel motors guarantee better traction and manoeuvrability

AUXILIARY CONTROL (A-SAC)

Selectable Auxiliary Control

- VERSATILITY**
Up to 5 independent hydraulic auxiliary circuits:
- AUX1 — general purpose
 - AUX2 — supporting functions (rotation)
 - AUX3 — clam shell bucket (bucket diverter)
 - AUX4 — tilting coupler control
 - AUX5 — hydraulic coupler control

Selectable Auxiliary Control (SAC) system allows for control pattern customization and optimal attachment fit (integral part of AUX4 option):

- Selectable boom or arm mounted auxiliaries
- Geith, Klac and Lehnhoff hydraulic coupler options
- Lehnhoff type couplers with optional tilting adapters
